

In 2006 Shweta made a film for CNN about the dolphins in The Ganga

Can you answer these questions by reading the text below?

- 1. Why are the dolphins dying?**
- 2. How many of them are left?**
- 3. Who is trying to save them?**

“Narora (Uttar Pradesh): Dolphins are a dying species in the Ganga today because of pollution or being trapped in fishermen's nets. With only a few thousand left, scientists from the World Wide Fund for Nature are doing their best to save these gentle creatures.”

Now watch Shweta’s report about the dolphins. Who else does she visit?
(Click on the link below and then the triangle in the black box, and wait for the advert to finish)
